## Breathing Management

### Oxygen Concentrator - 5L

Features a flow range of 0.5-5 LPM

[Read More](#)

**SKU:** 33950

**Price:** \$585.00

**Stock:** instock

**Categories:** [Respiratory](#)

**Case Quantity:** 1/cs

### Product Description

The Dynarex Resp-02™ Oxygen Concentrator is a convenient, top-grade medical device that helps relieve respiratory difficulties for patients with breathing problems. You'll love the quiet operation and user-friendliness of this durable, reliable machine. Designed for use with a nasal canula, this premium concentrator weighs only 37 pounds and is easily transportable with four smooth rolling casters and easy-grip top handle. Perfect for use at home and a wide range of medical settings including clinics, long-term care, rehab facilities, and much more. Patient controls are easily accessible so adjusting oxygen flow rates is a breeze. Audible and visual alarms and manual reset button help to ensure consistent operation and optimal safety. •Audible and visual alarms include Low Flow-rate, Low/High Pressure, and Power Failure •Manual reset button helps ensure uninterrupted oxygen delivery •Designed for quiet operation with low noise output •Easy-to-read

control panel for optimal visibility

## Syringes With Needle - 3cc - 20G. 1.5" needle

Conventional syringe with easy-to-read scale markings for accurate dosing.

[Read More](#)

**SKU:** 6996

**Price:** \$88.65

**Stock:** instock

**Categories:** [Clinical Care](#), [Syringes and Needles](#)

**Case Quantity:** 8/100/cs

### Product Description

The Dynarex Syringes with Needle are designed for comfortable injections. The thin wall needles have a double bevel, allowing for ease of penetration and a greater volume of fluid to pass. All needles are color coded to represent the gauge of the needle and attach to the syringe by either luer lock or luer slip connection. •Conventional syringe with easy-to-read scale markings for accurate dosing. •Color-coded needle hub for quick identification of the needle gauge •Smooth-gliding plunger promotes accurate medication measurement •Surgical grade stainless steel, double-beveled needle •Non-Toxic •Non-Pyrogenic

## Syringes With Needle - 3cc - 25G, 1" Needle

Conventional syringe with easy-to-read scale markings for accurate dosing.

## Product Description

The Dynarex Syringes with Needle are designed for comfortable injections. The thin wall needles have a double bevel, allowing for ease of penetration and a greater volume of fluid to pass. All needles are color coded to represent the gauge of the needle and attach to the syringe by either luer lock or luer slip connection. •Conventional syringe with easy-to-read scale markings for accurate dosing. •Color-coded needle hub for quick identification of the needle gauge •Smooth-gliding plunger promotes accurate medication measurement •Surgical grade stainless steel, double-beveled needle •Non-Toxic •Non-Pyrogenic

## Syringes With Needle - 10cc - 20G, 1.5" Needle

Conventional syringe with easy-to-read scale markings for accurate dosing.

### Tourniquets – Latex Free, 1" x 18", Blue

Designed to regulate blood flow during blood draws or in emergencies

[Read More](#)

**SKU:** 3139

**Price:** \$320.00

**Stock:** instock

**Categories:** [IV Therapy](#)

**Case Quantity:** 10/250/cs

### Product Description

The Dynarex Tourniquet is a flexible band designed to help constrict blood flow during routine blood draws or when needed in emergency situations. This premium Tourniquet is crafted from smooth, tear-resistant elastic for optimal patient comfort and improved durability. The convenient Tourniquet is individually rolled and banded for easy kit-packing. The Dynarex Tourniquet is ideal for hospitals, medical facilities, and emergency rooms.

- Features strong, tear-resistant elastic for optimal durability and reliability
- Crafted with smooth materials for enhanced patient comfort
- Measures 1" x 18" to easily accommodate adults and children
- Conveniently rolled and banded for easy kit-packing and quick portability
- Disposable, not made with natural rubber latex or DEHP

## DynaSorb Super Absorbent Dressings - Non-Adherent - 4"x4"

Multi-layered dressing with a contact layer and waterproof backing to prevent contamination.

[Read More](#)

**SKU:** 3087

**Price:** \$280.80

**Stock:** instock

**Categories:** [Bandages And Band Aids](#), [Wound Care](#)

**Case Quantity:** 12/10/cs

### Product Description

DynaSorb Super Absorbent Dressing is a multi-layered, one-piece dressing available as non-adherent or self-adherent with a contact layer and waterproof backing to prevent contamination. These dressings are constructed to facilitate the management of moderate to high levels of exudate to promote faster healing. The super absorbent core rapidly absorbs wound exudate, locking it away, minimizing risk of maceration while supporting a moist wound environment. •Super absorbent polymer core rapidly absorbs exudate, locking it away, minimizing the risk of maceration. •Soft and conformable. Pliable enough to allow for a range of movement during use. •High absorbency dressing used for heavily exuding wounds. •Primary or secondary dressing for partial to full thickness at stages 2, 3 or 4. •Used to treat leg and pressure ulcers, surgical wounds and donor sites.

## DynaSorb Super Absorbent Dressings - Non-Adherent - 6"x6"

Multi-layered dressing with a contact layer and waterproof backing to prevent contamination.

### Product Description

Dynarex's SiliGentle Silicone Bordered and Non-Bordered Foam Dressings excel in exudate management.

They are soft and adaptable to provide a moist wound environment to accelerate healing. It has a highly absorbent pad with a vapor permeable waterproof film to lock away exudate and minimize pain and trauma. The silicone layer easily moves without losing its adherence protecting the wound. •Soft and comfortable with superior absorption locks exudate away. •Vapor permeable waterproof film and silicone contact layer that is gentle on wounds and moves without losing adherence. •High absorbency dressing used for high exuding wounds. •Primary or secondary dressing to treat and manage partial to full thickness wounds at stages 2, 3 or 4.

**Case Quantity:** 12/10/cs

## Product Description

DynaSorb Super Absorbent Dressing is a multi-layered, one-piece dressing available as non-adherent or self-adherent with a contact layer and waterproof backing to prevent contamination. These dressings are constructed to facilitate the management of moderate to high levels of exudate to promote faster healing. The super absorbent core rapidly absorbs wound exudate, locking it away, minimizing risk of maceration while supporting a moist wound environment. •Super absorbent polymer core rapidly absorbs exudate, locking it

away, minimizing the risk of maceration. •Soft and conformable. Pliable enough to allow for a range of movement during use. •High absorbency dressing used for heavily exuding wounds. •Primary or secondary dressing for partial to full thickness at stages 2, 3 or 4. •Used to treat leg and pressure ulcers, surgical wounds and donor sites.

---

## DynaSorb Super Absorbent Dressings - Non-Adherent - 6"x6"

Multi-layered dressing with a contact layer and waterproof backing to prevent contamination.

### Product Description

Dynarex's SiliGentle Silicone Bordered and Non-Bordered Foam Dressings excel in exudate management. They are soft and adaptable to provide a moist wound environment to accelerate healing. It has a highly absorbent pad with a vapor permeable waterproof film to lock away exudate and minimize pain and trauma. The silicone layer easily moves without losing its adherence protecting the wound. •Soft and comfortable with superior absorption locks exudate away. •Vapor permeable waterproof film and silicone contact layer that is gentle on wounds and moves without losing adherence. •High absorbency dressing used for high exuding wounds. •Primary or secondary dressing to treat and manage partial to full thickness wounds at stages 2, 3 or 4.

## SiliGentle™ Silicone Bordered Foam Dressings - Heel - 10 x 9in
